

Florida International University's Jack D. Gordon Institute of Public Policy is accepting applications for Research Affiliates to participate in the collaborative work, data and information sharing and creation of research products relating to security challenges in the Western Hemisphere. The qualified Research Affiliates will be granted access to FIU Security Research Hub (SRH) collaborative environment, where data and information on 12 different security themes, along with various analytical, visualization tools, and cloud computing environment are made available for a group of collaborators.

Research Affiliates will have access to:

- FIU library, data resources, email, and other university communication platforms
- Point-to-point communication with fellow affiliates and FIU network of researchers
- Educational courses and workshops
- SRH collaborative environment

Candidates must have a bachelor's degree or higher and some academic background or work experience in international relations, political science, national security, cyber, research, or data analysis with a focus on Latin America and the Caribbean.

Research Affiliates will be expected to:

- Produce annual analytic papers that are between 5-7 pages in length or produce textual material on a security challenge (e.g., infographics, data products)
- Peer review at least 2 analytic papers or textual materials from fellow affiliates over 12-month period
- Comment/engage with other affiliates on the SRH website
- Attend SRH organized workshops, research group discussions, and affiliate events

Research Affiliate applicants send packets to SRH@FIU.EDU. Packets should include:

- Curriculum Vitae
- 200-hundred-word justification for why they want to be an affiliate and how it would benefit themselves and the SRH community
- Security challenge topic they are interested in researching

For any questions relating to the Research Affiliates please contact the Security Research Hub Program Coordinator, Alex Gocso at SRH@FIU.EDU.
